Create a no-code responsive website with Webflow
Advanced MySQL Topics
Programming in Python

Nikita Bhandari

Data Analytics | SQL | Advanced Excel | Dashboard Development | Python | Power BI | TallyPrime
India

Summary

Aspiring Data Analyst with a B.Sc. in Information Technology, focused on transforming business data into actionable insights through analytics and interactive dashboards. My current skill set includes SQL, Advanced Excel, Python, JavaScript, HTML, CSS, Chart.js, and TallyPrime, along with a strong foundation in databases and backend development using FastAPI and PostgreSQL. I enjoy building projects that solve real business problems. My recent work includes an interactive Retail Sales Analytics Dashboard featuring KPI tracking, customer segmentation, product performance analysis, and business reporting. I have also developed backend applications, including Warehouse Management and E-commerce systems, which strengthened my understanding of databases, APIs, and business workflows. I am continuously expanding my knowledge of data analytics, business intelligence, and reporting by building practical projects and learning industry-relevant tools. I'm currently seeking opportunities in Data Analytics, MIS, Business Reporting, ERP Support, and related roles, where I can apply analytical thinking, technical skills, and a problem-solving mindset to support data-driven decision-making.

Experience

Data Analyst (In Training & Independent Projects)
June 2026 - Present (1 month)

Project Focus: Built an interactive Retail Sales Analytics Dashboard analyzing 15,000+ retail transactions to simulate real-world business scenarios.

Engineered backend workflows using FastAPI and PostgreSQL to master database architecture and business logic.

Formulated key business metrics and KPIs, including customer retention rates, average basket size, and product velocity.

Designed clean, responsive frontend dashboards using HTML, CSS, JavaScript, and Chart.js.

Applied SQL and Excel for data cleaning, transformation, and deep-dive analysis.

Enjay IT Solutions Ltd.

Web Developer

May 2024 - June 2024 (2 months)

Bhilad, Gujarat, India

- Implemented frontend–backend data flow between HTML/JS views and PHP endpoints backed by MySQL queries
- Gained hands-on exposure to production development workflows: version control, code review, and structured project handoff

Education

N. B. Mehta College of Science and Commerce

Bachelor of Science - BSc IT, Information Technology · (June 2023 - April 2026)
