PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on experience building analytics pipelines, KPI dashboards, and backend systems. Analyzed 15,000+ retail transactions, built Power BI manufacturing dashboards (DAX + Power Query), and engineered PostgreSQL-backed APIs. Proficient in SQL, Advanced Excel, Python (Pandas, NumPy), Power BI, and FastAPI. BSc IT graduate (University of Mumbai, 2026) with 4 Meta/Coursera certifications.

TECHNICAL SKILLS

Analytics	SQL (MySQL, PostgreSQL), Advanced Excel, Power Query, Pivot Tables, DAX, Data Cleaning
Visualization	Power BI, Chart.js, KPI Dashboard Development, Business Reporting
Programming	Python (Pandas, NumPy), FastAPI, REST APIs, SQLAlchemy, Pydantic
Tools	Git, GitHub, Docker, Postman, TallyPrime ERP, VS Code

EXPERIENCE

Data Analyst — Independent Projects | Self-Directed

Jun 2026 – Present

- Built Retail Sales Analytics Dashboard on 15,000+ transactions; automated 8-metric KPI framework (retention rate, basket size, product velocity), cutting manual reporting effort by ~60%.
- Developed Manufacturing Efficiency Dashboard (Power BI) using DAX and Power Query to track OEE, downtime, and quality metrics across production lines.
- Engineered FastAPI + PostgreSQL backend with data ingestion workflows, business logic, and API-driven reporting; built Chart.js frontend for stakeholder visualization.

Web Developer (Internship) | Enjay IT Solutions Ltd.

May – Jun 2024

- Implemented HTML/JS frontend–PHP/MySQL backend data pipelines in a production environment; practiced Git-based version control and structured code review.

PROJECTS

Excel Business Dashboard — Excel • Power Query • Pivot Tables • VBA

- Dynamic sales dashboard with auto-refreshing Power Query pipelines, conditional-format KPI cards, and interactive pivot charts for management reporting.

Manufacturing Efficiency Dashboard — Power BI • DAX • Power Query

- Created Power BI dashboard tracking OEE (Overall Equipment Effectiveness), downtime analysis, and quality reject rates using DAX measures and Power Query data transformation.

E-Commerce Backend API — FastAPI • PostgreSQL • SQLAlchemy • JWT • Docker

- Production-ready backend with JWT auth, RBAC, product CRUD, cart & order management deployed on Render; normalized PostgreSQL schema with Pydantic validation.

Warehouse Management System — FastAPI • PostgreSQL • REST APIs

- Inventory tracking system with multi-location stock transfers, inbound/outbound shipment management, low-stock alerts, and role-based access control.

EDUCATION

BSc Information Technology

N. B. Mehta College of Science and Commerce, University of Mumbai

Apr 2026
